DATE : **August 22, 2021**

NAME OF PROJECT	PUROK-3 WATER PROJECT PHILIPPINES
OBJECTIVES	This projects aims to: 1. provide clean and sustainable water system supply, 2. Safeguarding the residents from any form of illness due to unclean water. 3. Lessen the burden of the residents that need to fetch water from far just to get clean water for free.
EXPECTED OUTPUT	Deep well with concrete tub and washing area with roof
OUTCOME	Clean, safe and healthy community with enough water supply
PROJECT DATE AND DURATION	November 22-28, 2021 (7 days)
TARGET BENIFICAIRIES	20 families, residents of Purok 3, Lagundi, Bongbong, Pantukan Davao de Oro a. Sawato (2 families) b. Ranain (2 families) c. Banados (8 families) d. Pulieda (1 families) e. Florentino (7 families)
BACKGROUND	Barangay Bongbong Pantukan is located in the coastal area in the municipality of Pantukan Davao de Oro Philippines. In 2015 it has a total population of 3,659 composed of more but not less than 1,500 families living in 7 different purok or sitios. It is known us Muslim community because they dominated the area. One of it sitios is called Lagundi in purok 3 where the proponent is living.

	<p>Currently, There was NO concrete water system to supply the whole community except for some flowing water donated by the Local Government Unit (LGU) but only accessible by those who are living beside it. Those who are living in the far are needs to walk or by car to fetch the water. Some of those who can afford also build a water pump for them and their neighbors; however, the water can only be used for taking a bath and washing.</p> <p>In our purok where the proponent is living, there is a portion that the 20 houses / families is a little bit far from the water supply. We are only depending in the water pump nearby the small masjid. Unfortunately, the water from it is NOT also good for drinking.</p> <p>In view thereof, the proponent is requesting for the deep well that produce clean and fresh drinking water.</p> <p>JUSTIFICATION:</p> <p>The following reasons are the justification why do we need to ask the assistance for this.</p> <ol style="list-style-type: none"> 1. The budget that is coming from the local barangay cannot afford to sustain all the needs of its increasing number of the constituent. 2. Residents are in need of drinking water to keep them safe from illness due to unclean water specially now is Pandemic. 3. The pump water that we are using now is not in good condition because it was built 5 years ago. <p>NOTE:</p> <ul style="list-style-type: none"> - Not pursuing this project will result health problem in the future while the burden of fetching water from far will be continued to experience by the poor people.
<p>FINANCIAL REQUIREMENTS</p>	<p>PHP100, 000 Deep Well PHP 75,000 Covered wash area with tub.</p> <p>Total : PHP175,000 = GBP2,500</p>
